

CONTINUATION TRAINING

Continuation Training includes all training activities delivered to Air Traffic Controllers, Air Navigation Service Employees and Air Traffic Safety Electronics Personnel to maintain knowledge and skills and/or to prepare for changes to the operational environment. It includes Refresher, Emergency and Conversion Training.

Refresher Training

Refresher Training is designed to maintain awareness of the current operational practices and procedures. It may include rarely used procedures and practices, such as seasonally dependent procedures, trends and observations from occurrence reports and results of normal operations safety surveys.

Emergency Training

Emergency Training include training activities to maintain knowledge and skills in dealing with emergency and abnormal traffic situations to sustain a level of constant awareness.

Conversion Training

Conversion Training provides a set of knowledge and skills appropriate to cope with changes to the operational environment.
