

AIP SCREENING SERVICE

Aeronautical Information Publications (AIP) worldwide are updated and distributed every 28 days. Keeping track of all the changes relevant to an operation is tedious and labour intensive. The AIP screening service helps you to keep track of exactly such changes. The updates are screened based on customer specific criteria, extracted, collected and sent to you as electronic documents.

Features

- Screening of AIP based on customer criteria
- Collection and compiling of screening results
- Results as electronic documents

Benefits

- Screening of AIP updates worldwide
- Screening of AIP updates based on customer specific criteria
- Delivery as electronic documents
