

# INTEGRATED BRIEFING SERVICE

Skyguide AIM offers an integrated briefing service that provides NOTAM and MET briefings compliant to ICAO and Eurocontrol standards. Additionally, initial ATC flight plan filing is also part of the service. The service platform is customizable and specific products are easy to integrate. Interfaces for application developers are available.

The service runs on standard desktop or mobile computer devices connected to the internet and equipped with a web browser. The application can be configured to run on self-service briefing terminals at an airport.

## Features

- Standard NOTAM briefings
- SmartNOTAM briefings with tailored information
